

REC Site Regulations

Lange Lijnbaan 14, Harlingen, Netherlands

Evacuation/fire/accidents

In the event of emergency:
Internal alarm number 0517 432390
External alarm number 1-1-2

- Report the nature of the accident or emergency. The staff in the control room alerts Company Emergency Response (BHV) personnel or calls the Regional Alarm Centre (1-1-2) and, upon arrival of the emergency services, indicates the location of the accident or emergency.
- Stay with the victim until a Company Emergency Response employee arrives at the scene (identified by a BHV vest). Follow the instructions issued by the Company Emergency Response employee.
- In the event of fire, remain calm and report the fire.
- Do so by breaking the glass on the nearest manual fire alarm button.
- Prevent the fire from spreading by closing windows and doors.
- If possible, try to extinguish the fire immediately (only in the case of an incipient fire).
- Leave the building when you hear the evacuation signal (slow whoop).
- Use the nearest (emergency) exit.
- Take colleagues, neighbours and visitors with you.
- In the event of smoke, keep close to the ground.

In the Services building

KM

General rules

- You enter this site at your own risk. Shovels have priority.
- Collecting together substances and/or products from the waste materials and removing them from site is strictly forbidden.
- When on site, you must take the most direct path between the entry gate and your destination.
- You may only enter the site when wearing the personal protective equipment that has been agreed by the technical department to be appropriate for the location in question (high-visibility work clothing (reflective)/vest and safety shoes).
- Working with a bare torso, bare legs and open shoes on site is forbidden.
- Other people present in the vehicle passenger cab during the period spent on site may not leave the cab; visits to the operations building and the canteen are permitted. Children younger than 12 years old may not enter the site.
- The consignment must be unloaded in accordance with instructions given by the inspector.
- Prevent noise nuisance by avoiding unnecessary use of the horn, do not accelerate aggressively or brake hard as this causes garbage container lids to bounce up and down loudly.
- Working on site under the influence of alcohol, drugs or medication that slows your speed of reaction or impairs your judgement is forbidden. Using these substances or having them on your person when on site is also forbidden. Omrin may carry out or have others carry out inspections to establish the presence or use of these substances.
- Smoking is only permitted in the designated smoking areas.
- You must comply with the indicated maximum speed and traffic regulations.
- Eating and drinking in the workplace is forbidden for reasons of hygiene (HACCP) and health. If you make use of the canteen at the site, you must remove dirty (work) clothing or dirty shoes and wash your hands before entering the canteen.
- Prevent damage on buildings and installation. When damage took place call the control room so repair action can be made.

Drivers and suppliers

- Reporting in at the weighbridge/gatehouse is mandatory.
- Trailers and skips must be set down in the designated spaces on the site, as indicated by signs/demarcation lines.
- The load must be covered over in such a way that nothing can fall off during transportation. When dumping waste, tarpaulins, mesh netting and suchlike may not be removed until the position where the consignment is to be unloaded has been reached.
- Tarpaulins, mesh netting and suchlike must be removed at the inspector's request. This is required for inspection purposes.
- Trucks and skips must be checked for the presence of dirt or contaminants attached to the outside. Any dirt or contaminants attached to the outside must be removed. The driver must also check the empty skips to determine whether waste has been left behind inside the skip.
- Tanker trucks must make use of the safety facilities.

(Main) Contractors

- A Health, Safety and Environment plan must be drawn up for the construction site. The HSE plan must be included in the construction specifications.
- The main contractor at the construction site is responsible for the health and safety of all those working or present on site. REC BV denies all liability associated with working at the construction site.
- Earthmoving machines that are left behind on site and other mobile systems must be parked in a safe area of the site (where a fire has no consequences) in consultation with the foreman or Omrin's technical department. The (spare) keys and unlock codes for these machines must be given to the commissioning party in question or Omrin employee for use in the event of emergencies outside working hours.
- Contractors are not permitted to use their own mobile fuel tanks without first gaining permission from the commissioning party or site management.
- Fuel tanks for red diesel are present at REC; these may be used for refuelling subject to consultation with the commissioning party/and or Omrin's technical department.
